Backend	Laravel, PHP, Node.js, Express.js, REST APIs, JWT Authentication
Database	MySQL, Database Design, Query Optimization
Tools	Git, GitHub, Vercel, Postman, Figma, VS Code, cPanel
Other	SEO Optimization, Responsive Design, Payment Gateway Integration

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer — Remote

2021 – Present

- Developed scalable business solutions including hospital management systems, multi-vendor eCommerce platforms, training institute websites, and estate management systems.
- Built responsive user interfaces optimized for desktop, tablet, and mobile devices.
- Integrated secure payment systems, authentication workflows, role-based access control, and API services.
- Managed hosting deployment, SEO optimization, and production-ready application delivery.
- Designed modern UI/UX experiences focused on performance and user engagement.

SELECTED PROJECTS

Hospital Management System

Designed a healthcare management platform with patient records, HMO management, appointment scheduling, staff administration, and medical reporting systems.

Multi-Vendor eCommerce Platform

Built a scalable marketplace platform with vendor onboarding, inventory management, payment integration, and customer management.

Estate Management & Visitor Access System

Developed a secure estate platform featuring subscription management, QR visitor access, resident authentication, and admin dashboards.

Izy Essentials eCommerce Platform

Created a modern grooming products platform focused on responsive design, secure checkout systems, and seamless shopping experiences.

Corporate Business & Cleaning Platforms

Built responsive company websites for cleaning, training, and property management companies with strong SEO and modern UI design.
